RSC

CORPORATE SOCIAL RESPONSIBILITY AND ENVIRONMENTAL MANAGEMENT

Each Econet basketball is a unique piece of craftsmanship in the form of a basketball net. Made by nets from marine waste, they are recycled and then restored by hand by the Galician nets using the same technique that they use to repair and manufacture fishing nets.

Our goal: to jump higher every day. We believe in sport as an engine for change.

We dream of reaching as many hoops and goals without net as we can.

Can you imagine joining the hypnotic sound of the sea with the sound of a ball scoring a goal?

An attitude, a philosophy with which we fully identify.

We do not pretend to be the world's best company but we want to be a reference to achieve a better world.

We join ECOBALLUTION to be part of the actions they do so we will give as a present

AN OFFICIAL ECONET BASKETBALL NET to each TEAM.

This way we all do our bit for the cleanliness of the seas.
